

How Much Do You Make From Adsense Per Day?

These year I've been seeing huge drop in my adsense earning really huge that i came to next to nothing. I used to cash in my earnings every month but now I think I'm not gonna make it. I've been talking to other friends of mine and in other networks and I think I'm not the only one who is having the same problem is it due to change in algorithm like the recent google Panda and Penguin? :(
