

PRESTASHOP CUSTOM HTML INSIDE HEAD TAG ON SELECTED

Posted by zohaibfk - 2021/07/06 00:35

The module allows adding custom CSS, HTML, tags, javascript code inside the head tag on selected pages.

It helps to add different tags related to SEO, design, and different software integration on the head tags like SEO website verification, open graph, twitter card, schema markup, geolocation tags, and other useful tags without editing tpl files.

It helps to add HTML related design CSS, custom javascript code from different services like visitors video recording, heat-map, and analysis software integration hotjar, the full story, humcommerce, etc.

It helps to add HTML for different online chat software integration like Zendesk, Zoho chats.
